

## Prosun Solar & APS

Prosun Solar's aim has always been to concentrate on representing and Distributing High Quality Brands.

Prosun has always looked at Products that have a Point of Difference and have been under represented in Australia.

Prosun has the Reputation of taking Brands to the next Level in that they become Household Names.

These are either unknown Brands in our Region or one's that have not had the Marketing and or support they have deserved or required.

### APS

AP Systems was founded in 2010 in Silicon Valley USA and since 2019 is ranked Number #1 multi-module microinverter manufacturer worldwide.

As a Global Leader in its field APS R&D and Manufacturing is based on their own Proprietary Solar Technology offering the widest range of microinverters available on the market.

APS Micro Inverters combine highly efficient power inversion that can add up to 20% more Output than conventional String Inverter Technology and were the First with a True 3 Phase Micro Inverter in the YC1000.

A truly Global Brand with more than 100,000 Installations and +110 Patents, APS is represented by Offices on all Continents.

With accelerated Testing of more than 20,000 Hours guarantees the Quality of APS Micros with a failure rate of only 0.3%

Prosun has partnered with APS in an effort to accelerate the status of APS amazing Innovations in Micro Inverter Products and Technology for the Australian Market to the equivalent of its Global Reputation.
